## LEE ENFIELD RIFLE DRILL

### SECTION 1

#### BASIC RIFLE DRILL

##### 1.1 INTRODUCTION

1.1.1 General. Before commencing instruction in rifle drill, it is important that the cadets receive instruction in the parts of the rifle.

Figure 1-1 Parts Of The Rifle

1.1.2 Lee Enfield rifle. The Sea Cadet Organization opted for the Lee Enfield rifle to execute rifle drill movements for the following reasons:

- a. a majority of Sea Cadet Corps already had them in stock;
- b. the Canadian Forces had enough of them in stock to be able to issue to those Sea Cadet Corps which didn't have any or not enough;
- c. secure storage for this type of rifle (manual loading) is governed by regulations not as strict as those for semi-automatic and automatic rifles, making it more accessible to Sea Cadet Corps; and
- d. cadets are not authorized to drill with the C7 rifle.

1.1.3 References. Each kind of weapon has by its form and dimension, its proper drill. It is very important that those are used for an easy use of the rifle. Rifle drill described in the "Canadian Forces Drill and Ceremonial" manual (C1 and C7 rifles) should not be used.

1.1.4 *B.R. 1834 (49) Royal Naval Handbook of Parade and Rifle Drill*, publication in effect when the Lee Enfield rifle was used by the Armed Forces of the Commonwealth, was used as a reference document to write this chapter.

1.1.5 Rifle Movements. Unless stated otherwise, cadets carrying out rifle exercises are to have impressed on them the following important points:

- a. the body and head are to be kept perfectly still while the rifle is moving;
  - b. the eyes are not to follow the movement of the rifle. They are to be kept looking to their front at their own level;
  - c. the rifle, during its movements, is to be kept as close to the body as possible;
  - d. the rifle is always to be moved as quickly as possible and the standard pause between all rifle and foot drill movements is observed;
  - e. the fingers are kept close together; and
  - f. the disengaged hand is brought to the rifle by the shortest route and as quickly as possible; and the same principle applies when returning the disengaged hand to the position of attention.
- 1.1.6 Rest Periods. In the early stages of recruit training, short rest periods shall be given during drill instruction by standing the squad easy. During these rest periods, the squad may be questioned on subjects previously taught. The squad shall not be kept in any one position long enough to produce strain and fatigue. Periods of drill at the halt shall be interspersed with movements on the march, with or without arms, at appropriate intervals to keep the squad alert, exercise the muscles, and, as a result, produce a high standard of drill.

1.1.7 There are two methods of grasping the rifle for the movements outlined in this chapter:

- a. Full Round Grasp. The specified part of the rifle is held with a tight grip, thumb on one side, fingers together and grasping as much of the rifle as possible around the opposite side; and
- b. Y-Grip. The specified part is held with the thumb on one side, fingers together and straight on the opposite side. If fingers are to be pointed in a certain direction, it shall be stated in the movement.

## 1.2 ATTENTION

1.2.1 To assume the position of attention (order arms), squad members shall:

- a. grasp the rifle with the right hand in the Y-grip, just below the lower band, fingers extended straight down the right side of the rifle with the thumb on the left side touching the seam of the trousers. The position of the right hand will not vary with the height of the individual, but the position of the right elbow will be either bent or straight. If the elbow is bent it will be held close to the body and to the rear;
- b. place the butt flat on the ground with the rifle touching the boot, toe of the butt in line with the small toe of the right foot; and
- c. keep the magazine to the front.

Figure 1-2 Attention

### 1.3 STAND AT EASE FROM ATTENTION

1.3.1 On the command, STAND AT—EASE, squad members shall:

- a. force the rifle directly to the front and to the full extent of the right arm, grasping the rifle with a Y-Grip, keeping the toe of the butt in contact with the ground and in line with the small toe of the right foot;
- b. simultaneously, bend the left knee and place the left foot smartly on the ground 25 cm (approximately 10 in.) to the left; and
- c. keep the left arm straight at the side.

Figure 1-3 Stand At Ease

**1.4 STAND EASY FROM STAND AT EASE**

1.4.1 On the command, STAND—EASY, squad members shall:

- c. after observing a standard pause, relax the body.

1.7.5 When a squad is at the order arms position and the command, QUICK—MARCH, is given, the squad shall automatically adopt the short trail position as they step off with the left foot.
